

Products made from recycled plastic or waste rubber

1. The recycled plastics or rubber used as the raw material shall be 100% from the domestic and, the regenerated product shall be made from 100% waste plastics or rubber (excluding the additives which are added to improve product quality).
2. The recycled plastic may include the plastic dusts and defective products from a factory but shall not have any EPA listed hazardous substances. The sources and ratio of recycled plastics must be entered into the application form in detail.
3. Products are considered the same if they differ only in size or color.
4. The name and address of the Green Mark user must be clearly printed on the product or on the packaging material. For non-manufacturer users, the manufacturer's name and address shall also be shown.
5. The product or packaging material shall bear a label reading "100% recycled plastics".
